Description: Provide for the rehabilitation of the

Hearthstone Castle, a turn-of-the-century structure similar to the era of the Gillette Castle located on the Connecticut River.

Project: Danbury Hospital

Amount Requested: \$5,000,000

Description: Provide for a regional health information organization to improve physician to physician communication helping to improve patient care.

Project: Danbury Public Schools

Amount Requested: \$275,000

Description: To develop the Danbury Family Literacy Center to help enrich the learning experiences of children in the Danbury school system.

Project: Family Services of Greater Waterbury

Amount Requested: \$150,000

Description: To provide community development services throughout the Waterbury community to assist parents in supporting the educational and social development of their children.

Amount Requested: \$125,000

Description: To provide for an electronic client management system to increase staff efficiencies.

Project: Girls Inc.

Amount Requested: \$1,530,000

Description: Develop and expand programming to help prevent violence, address health related issues such as obesity, and stem rising negative body image issue among young girls. Girls Inc. has offices in Waterbury and Meriden.

Project: Greater New Britain Teen Pregnancy Prevention Pathways/Senderos Center

Amount Requested: \$243,200

Description: Enhance current services and serve as a demonstration model for teen pregnancy prevention.

Project: Town of Harwinton

Amount Requested: \$350,000

Description: Provide for the renovation of the Harwinton Community Hall built in 1840.

Project: Klingberg Family Centers

Amount Requested: \$500,000

Description: Provide at-risk youth with vocational programs, as well as technology enhancements, quality assurance and outcomes measurement, and staff training and development.

Amount Requested: \$885,000

Description: Provide for the construction of new space to house the growing vocational education program.

Project: City of Meriden

Amount Requested: \$1,500,000

Description: Design and construction of Phase III of the Quinnipiac River Linear Trail connecting outdoor recreational spaces in the City of Meriden.

Amount Requested: \$1,357,500

Description: West Main Street Streetscape Phase II re-paving project.

Project: Town of Middlebury

Amount Requested: \$1,186,887

Description: Provide for the upgrade of the Town's fifty-year-old public safety communications system.

Amount Requested: \$310,000

Description: For the purchase of a Class A Pumper for the Middlebury Fire Department to replace the current pumper which was purchased in 1981.

Project: Morris Foundation, Waterbury

Amount Requested: \$200,000

Description: For the renovation of space to expand substance abuse and mental health treatment and to provide additional recovery support services.

Project: Nature Conservancy, Connecticut Chapter

Description: Provide for before and after school programming.

Below is Congressman Chris Murphy's (CT-5) list of defense appropriations requests for Fiscal Year 2009. The dollar amounts listed are what were requested by the district organization seeking funds for their project. It is common for projects to be funded at lower levels than requested. The Appropriations Committee will choose not to fund many of these projects.

Project: Advanced Power Systems International, Lakeville

Amount Requested: \$4,900,000

Description: Demonstrate fuel catalyst capability in military vehicles to increase fuel efficiency.

Project: Articulated Technologies, Avon

Amount Requested: \$2,100,000

Description: Demonstrate the effectiveness of Thin Film LED lighting technology for better operations of Unmanned Aerial Vehicles (UAVs).

Project: Chemtura Corp., Middlebury

Amount Requested: \$2,000,000

Description: Provide for the development of a multifunctional antioxidant fuel additive to support the increased military use of biodiesel reducing the need for petroleum based fuels.

Project: Connecticut National Guard

Amount Requested: \$6,600,000

Description: To provide the 103rd Fighter Wing with a properly sized and configured engine shop to support the assigned mission of providing an engine repair shop to support the operations of

the A-10 aircraft.

Project: DRS Power and Control Technologies, Danbury

Amount Requested: \$12,400,000

Description: Design and build a Hybrid Propulsion Permanent Magnet Drive System for the DDG 51; construct a solid state direct current circuit breaker protection prototype for Navy fleet.

Project: Electro Energy, Danbury

Amount Requested: \$3,000,000

Description: Develop Bipolar Wafer-cell Nickel-Metal Hydride Batteries to provide additional and more flexible power options for a variety of military applications.

Amount Requested: \$2,000,000

Description: Develop Bipolar Wafer-cell Plug In Hybrid Electric Vehicle Batteries.

Project: Ensign-Bickford Aerospace & Defense Company, Simsbury

Amount Requested: \$5,000,000

Description: Begin integration of the Soldier Portable Solid Fuel Hydrogen Generator Cartridge system into fuel cell based, high-energy density power systems.

Project: Fuel Cell Energy, Danbury

Amount Requested: \$8,000,000

Description: Provide for the demonstration of a 1.2 megawatt fuel cell power plant at the Naval Submarine Base New London to provide pierside shore power.

Project: Goodrich Corp., Danbury

Amount Requested: \$22,400,000

Description: Develop Terahertz (THz) Spectrometer technology for use in various Homeland Security and medical applications; establish a pre-positioned, rapid-response reconnaissance payloads for Operationally Responsive Spacecraft.

Project: The Miller Company, Meriden

Amount Requested: \$2,800,000

Description: Project to demonstrate the effectiveness of copper to inactivate dangerous pathogens in military healthcare settings.

Project: Strategic Minerals Corporation (Stratcor)

Amount Requested: \$3,500,000

Description: Provide a Department of Defense-led epidemiological and toxicological study of the health and safety risks of Vanadium in DoD assets in order to develop biomarkers of exposure for a scientifically-based risk assessment.

Project: Treadwell Corporation, Thomaston

Amount Requested: \$4,100,000

Description: Continue the development and upgrade of the oxygen generators on the U.S. Navy's submarine fleet.

Project: United Technologies Corporation

Amount Requested: \$25,000,000

Description: Demonstration for a Hydrogen PEM fuel cell medium/heavy duty battery for military vehicles; engineering for the NP 2000 eight-bladed composite propeller system for the Air National Guard C-130.
